

Dear Special Events Coordinator.

You are receiving this package because we know you work hard to make your events "Special". We would like to help you by making your upcoming events "Turn-Key".

A great event is more than simple gear and music. There is no greater stress on event day than having things arrive late, broken or not at all! It is the talent that a qualified professional team brings to the event that matters most.

In business since 1993, we started in the South Florida markets serving all of Dade, Broward and the Florida Keys. In 2017, seeing a need for professional production and event logistics- we moved operations to serve Highlands County and all the surrounding areas. We invite you to look through the pages within this folder. It contains a small sample of the services we provide. We work with you from the first idea- all the way through the logistics and implementation of your event. Let us give you confidence that your event will flow smoothly and be an event that will impress your sponsors and guests.

From the analog days of the 1970's to high definition digital and smart phones, our world continues to change. We are always on the cutting edge of event technologies! Let our years of experience here in Florida be an asset to your Organization.

When you get a chance, check out our website for more information and PICTURES!
It's located at <http://www.mobilestagescentralflorida.com>
We look forward to meeting with you and showing you how we can take your event to the next level!

Sincerely

LeRoy Owens
